**1.General Village Maintenance:** We dug the trench and hole for the Sono tube for the tennis court camera system. We laid the pipe in and poured the cement and installed the pole and base. A large village tree fell at 2 Dunster Road. We cut up and removed the tree and stump, filled the hole with topsoil and seeded the area. Verizon came and installed the internet service for the tennis court cameras. We have trimmed all the bushes at the entrances and triangle. We have started and have continued going tree by tree to raise the canopy over the road and sidewalks of all village trees.
