Re: July Maintenance Report

1.General Village Maintenance: We finished the uplifting of village trees. We saw cut the sidewalk, driveway apron and corner ramp, and broke out the concrete at 201 Clent. We trenched and installed pipe from the telephone pole to the new location for the cameras. We installed the Sono tube, rebar and j-bolts and mixed the concrete. We removed the old light pole that was rotting and installed a new one in the new location and ran new electric for the light. We assembled the new pole and base and drilled out the cabinet and pole for the mounting brackets, we also ran the electric through the pole to the new cabinet and installed the pole. Verizon came in and ran their cable and installed the router and modem. The inbound cameras at Dunster, Darley and Melbourne were replaced. Those cameras will be installed at the tennis court in the future. The camera at the Joyce Cohn Path was changed due to the fiber optics going bad. The bushes and growth were trimmed back on Wensley Lane East and West.
